1.) Tulislah algoritma eliminasi gaus - jordan yg sudah dilengkapi dengan pivoting. Gunakan "mathematical - style pseudocode".

Algorithm GaussJordanPivot (A, B)
Input : $A \in \mathbb{R}^{n \times n}$, $b \in \mathbb{R}^n$
Output : $x \in \mathbb{R}^n$ such that $Ax = b$, or message "no unique solution"

Algorithm Gauss Jordan Pivot (A, b)
$M \leftarrow [A \mid b]$
For $k = 1$ to $n$ do
$p \leftarrow \arg\max |M_{ik}|$
If $M_{pk} = 0$ then return "no unique solution"
Swap $R_p \leftrightarrow R_k$
$R_k \leftarrow \frac{1}{M_{kk}} R_k$
For $i = 1$ to $n$, $i \neq k$ do
$R_i \leftarrow R_i - M_{ik} R_k$
end for
end for
$x_i \leftarrow M_{i,n+1}$, $i = 1, 2, \ldots, n$
return $x$
